

VITAMIN B - COMPLEX

Film - Coated Tablets

Composition:

Each tablet contains:

Active ingredients:

Thiamine mononitrate	2mg
Riboflavin	2mg
Pyridoxine hydrochloride	2mg
Calcium pantothenate	3mg
Nicotinamide	20mg

Excipients: Cellulose, aerosil, lactose, magnesium stearate, talc, hypromellose, polyethylene glycol, titanium dioxide, FD&C yellow no. 6, and D&C yellow no. 10.

Properties:

Vitamin B-Complex is a well balanced preparation that combines the B-complex group of vitamins which are essential for many metabolic processes. They act as parts of enzyme systems that are mainly associated with carbohydrate metabolism and nucleic acid synthesis. Thus, the members of this group of vitamins will directly or indirectly, affect the vitality of every cell of the body. Healthy people with balanced diets get an adequate supply of vitamin B-complex. However, if the body's need is not met, cell function will be impaired and **Vitamin B-Complex** will restore all functions to normal and the lost metabolic balance will be regained.

Indications:

Vitamin B-Complex is indicated for all patients who require vitamin B-complex supplement. This includes persons on restricted or deficient diets, in patients with malabsorption syndrome and those with long-standing diarrhoea or under intensive treatment with some antibiotics.

Vitamin B-Complex is also recommended for those persons with increased requirements such as during pregnancy and lactation, and for those with increased metabolic rates such as patients with defective utilisation as in liver disease and diabetes mellitus.

Dosage:

Adults: 1-2 tablets to be repeated 1-3 times daily or as directed by the physician.

If you miss a dose:

- Take the medicine as soon as you remember.
- If it is almost time for your next dose, wait until then to take the medicine and skip the missed dose.
- Do not take two doses at one time.

Precautions:

It is advised not to exceed the recommended dosage during pregnancy and lactation.

Side Effects:

Vitamin B-Complex contains water-soluble vitamins, which are considered generally safe. It is possible that riboflavin (vitamin B₂) may result in slight harmless yellowish discoloration of the urine.

Presentations:

Vitamin B-Complex Tablets: Packs of 20 or 40 tablets.
Hospital pack of 1000 tablets.

* Store at room temperature not exceeding 25°C, in a dry place.
